

## ABSTRACT

A trimmer head accessory comprising a (i) head with brush bristles on its underside and (ii) attachment hardware is disclosed. The attachment hardware may comprise (i) a spacer cup, (ii) a washer, and (iii) a set of fasteners. The head and attachment hardware are designed so that the present invention can be used to convert virtually any trimmer into an rotary scrubbing tool. The tool can be used for cleaning driveways, patios, garages, wood decks, walls, and even indoor surfaces.
